

INTEGRATION

POINT OF VIEW

JOYN Oil & Gas Production Integration

Keep your reports.

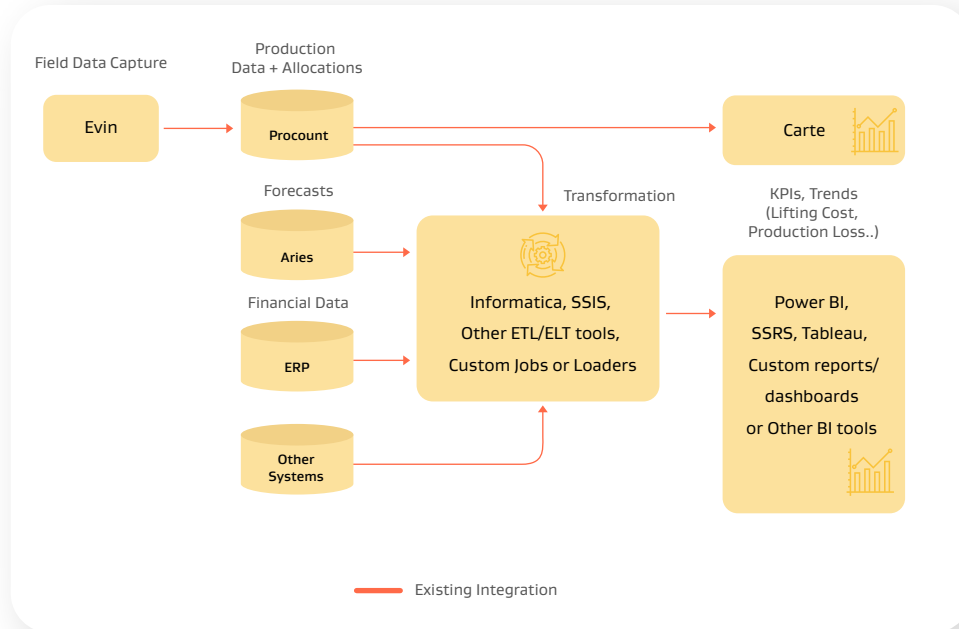

Keep your sanity.

Read more how JOYN integrates
with your existing IT setup.

Current State with P2 (No JOYN Oil & Gas Production)

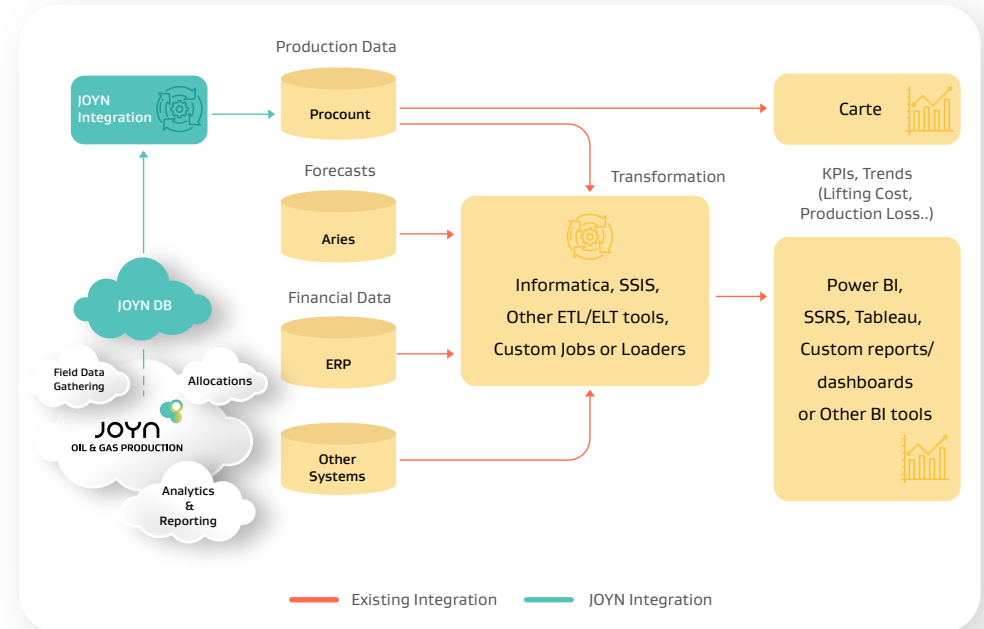

Are you feeling stuck with your current P2 setup? Paying for M&S, not getting any new features, unable to make any changes and waiting on customer support that lags.

- You've already paid for a perpetual license and now own your P2 setup. It's a sunk cost.
- Your M&S plan has you stuck with a setup that has a diminishing ROI.
- Retain your P2 Procount database and drop the M&S payments by switching to JOYN.
- Pay up to 50% less for a true SaaS solution with a cloud DB that integrates with your on-premise Procount DB.

Quick Start (With JOYN Oil & Gas Production)

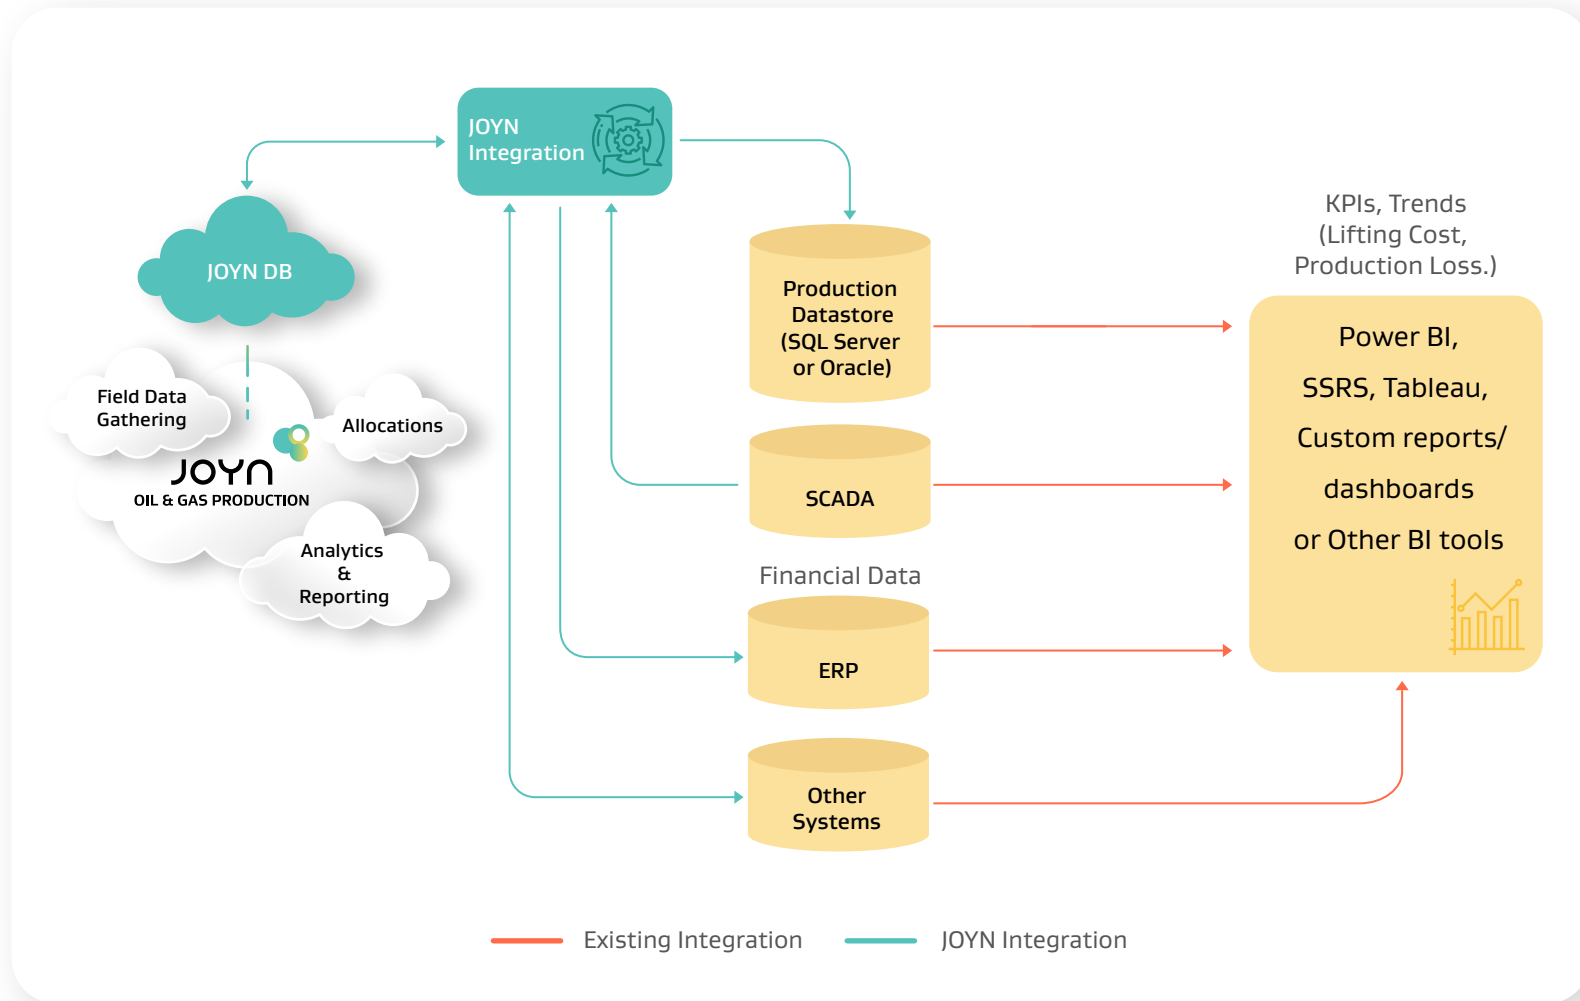

You could be here instead. Move your business processes over to JOYN, keep your Procount database, maintain your integrations, and keep your reports. All this in 28 days.

- SLT has deep expertise integrating with P2's Procount and has done so for over 4 years. And has a world class Customer Success team.
- Your Field Data Gathering, Allocations and Analytics move to JOYN.
- Your custom integrations stay the same. Your custom reports stay the same.
- JOYN gives you the flexibility to respond to upcoming regulatory changes. Saving you 4-5 months of custom development.

Full Integration (With JOYN Oil & Gas Production)

Realize the full benefit of JOYN with a complete cutover. You get innovative features built for world-leading producers, the latest maintenance and security updates, and a customer success team invested in you. **All for up to 50% less than what you're currently paying.**
